To Whom It May Concern,

I am a software engineer currently working part-time as a developer with Alberta Tomorrow. I also contribute to a startup video game studio, Glass Gecko Games. I am eager to explore new opportunities that will allow me to expand my skill set, collaborate with industry professionals, and thrive in a dynamic and challenging environment.

I am passionate about contributing to a company that values a welcoming and inclusive culture, believing that a positive work environment is essential for achieving excellence. I am excited about the possibility of applying my technical expertise and collaborative spirit within a team of seasoned professionals to tackle unique challenges together.

My journey from biological sciences to engineering has fueled my passion for software development, enabling me to develop a diverse range of skills both academically and personally. These skills, showcased in my resume, are complemented by my varied interests, including outdoor pursuits like snowboarding, rock climbing, backpacking, and mountain biking, as well as technical hobbies such as web design, video game development, and songwriting. My enthusiasm for new challenges drives me to continually acquire new skills and knowledge.

Leadership comes naturally to me, and I have embraced leadership roles throughout my career, from captaining my high school basketball team to leading projects at the university level, and now in taking leadership assignments in my current roles. I strive to be a supportive leader who delegates effectively, leads by example, treats others with respect and empathy, and sets both achievable and ambitious goals. I am eager to contribute to an organization that values mentorship, as I believe it will further refine my leadership abilities and contribute to my personal and professional growth.

I am genuinely excited about the prospect of working alongside experienced professionals and applying my unique skills to make a meaningful impact. I am confident in my ability to quickly learn new tools and technologies and contribute positively to any team. I eagerly anticipate the opportunity to demonstrate my capabilities.

Thank you for considering my application. I appreciate your time and attention and look forward to the possibility of working together.

Sincerely,
Chace Nielson
